5392447

DOCUMENT-IDENTIFIER: US 5392447 A

TITLE: Image-based electronic pocket organizer with integral scanning unit

	KWIC	
--	-------------	--

Detailed Description Text - DETX (22):

The touch sensitive electronic <u>display</u> panel 14, in combination with the linear electronic scanner unit 26, provides an easy to learn and use interface

that permits the operator to enter and retrieve data from the organizer with a

minimal amount of effort. For example, FIG. 6 illustrates one type of

information <u>display</u> that can be presented on the <u>display</u> panel 14 upon <u>power-up</u>

of the organizer in a preferred mode of operation. The illustrated information

identifies the owner of the organizer by name, address, company name (with

company <u>logo displayed</u>) and photograph. The advantage of the illustrated

organizer over conventional types of organizers can most readily be appreciated through the realization that none of the information displayed in FIG. 6 must be manually entered into the organizer by the operator.
